## Lesson 9 (Review / Iterate)

Slides – <https://a9i.sg/huayi>

mBlock – <https://ide.mblock.cc> (start mLink too!)

### Design Thinking

### Review / Checkpoint

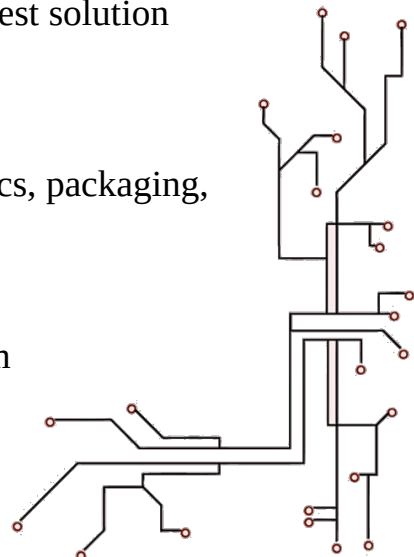

- Review Idea
- Review Problem Statement
- Work with your team to refine what you already have

### Keep In Mind

- User is the most important member of the design team
- If they are not around, empathize and think from their viewpoint
- Be open to criticism, feedback and creative destruction
- Don't mind what's hard to do at this stage, only what's the best solution

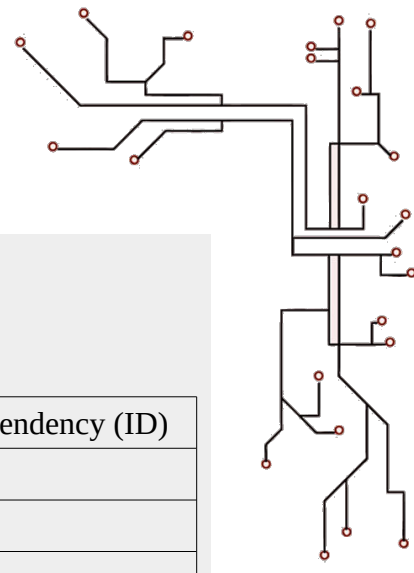

### Lite Project Management

- Break project into components (e.g. artwork, code, electronics, packaging, report)
- Break component into steps/tasks
- Set hard dates working back from project completion date
- Don't exaggerate your ability, or the complexity of each item

## ALP Project (Management)

**Make sure to keep this; you'll need to include it in your ALP report.**

ID	Description	Completion Date	Dependency (ID)

# A POSTERIORI

Play · Experience · Learn

## Temperatuer Sensor

### Pins Connections

Sensor	Arduino
Vcc	5V
Out	Any Analog (A0 - A5)
Gnd	Gnd

```
∞ map ∞ read analog pin (A) 0 from ( 0 , 1023 ) to ( 0 , 5 )
```

### Reading temperature & convert to Voltage

#### Converting voltage to °C:

$$\text{Temperature} = (\text{Voltage} - 0.5) \times 100$$

(broadcast result or save in a variable)

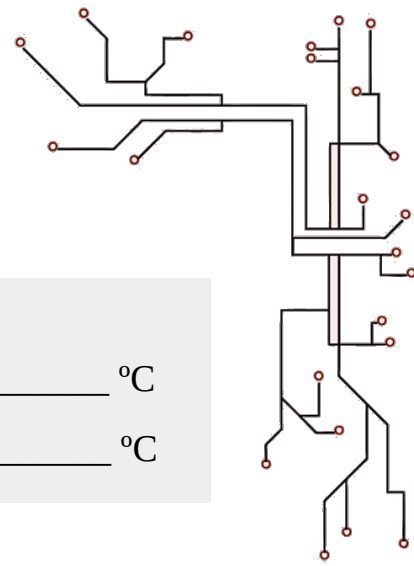

#### Showing temperature:

- Sprite Says (°36), like a speech bubble
- Or show in some other way

# A POSTERIORI

Play · Experience · Learn

## Activity

Record lowest temperature measured (of room, inside fist, etc) \_\_\_\_\_ °C

Record highest temperature measured (of room/inside fist, etc) \_\_\_\_\_ °C

## Heat Alarm

### Add On-Screen Alert!

- Choose a threshold.
- Show a Siren Sprite if Too Hot!

### Add Alarm!

- Choose a threshold
- Activate buzzer to alarm users

### **Buzzer**

+

-

### **Arduino**

Any I/O (Pin 2 to 12)

Gnd
