## Functions / My Blocks

# A POSTERIORI

Play · Experience · Learn

# Useful Functions / My Blocks

- Makes your programming easier
- Less trial and error
- Neater and more understandable programs

# Useful Functions (Dead Reckoning)

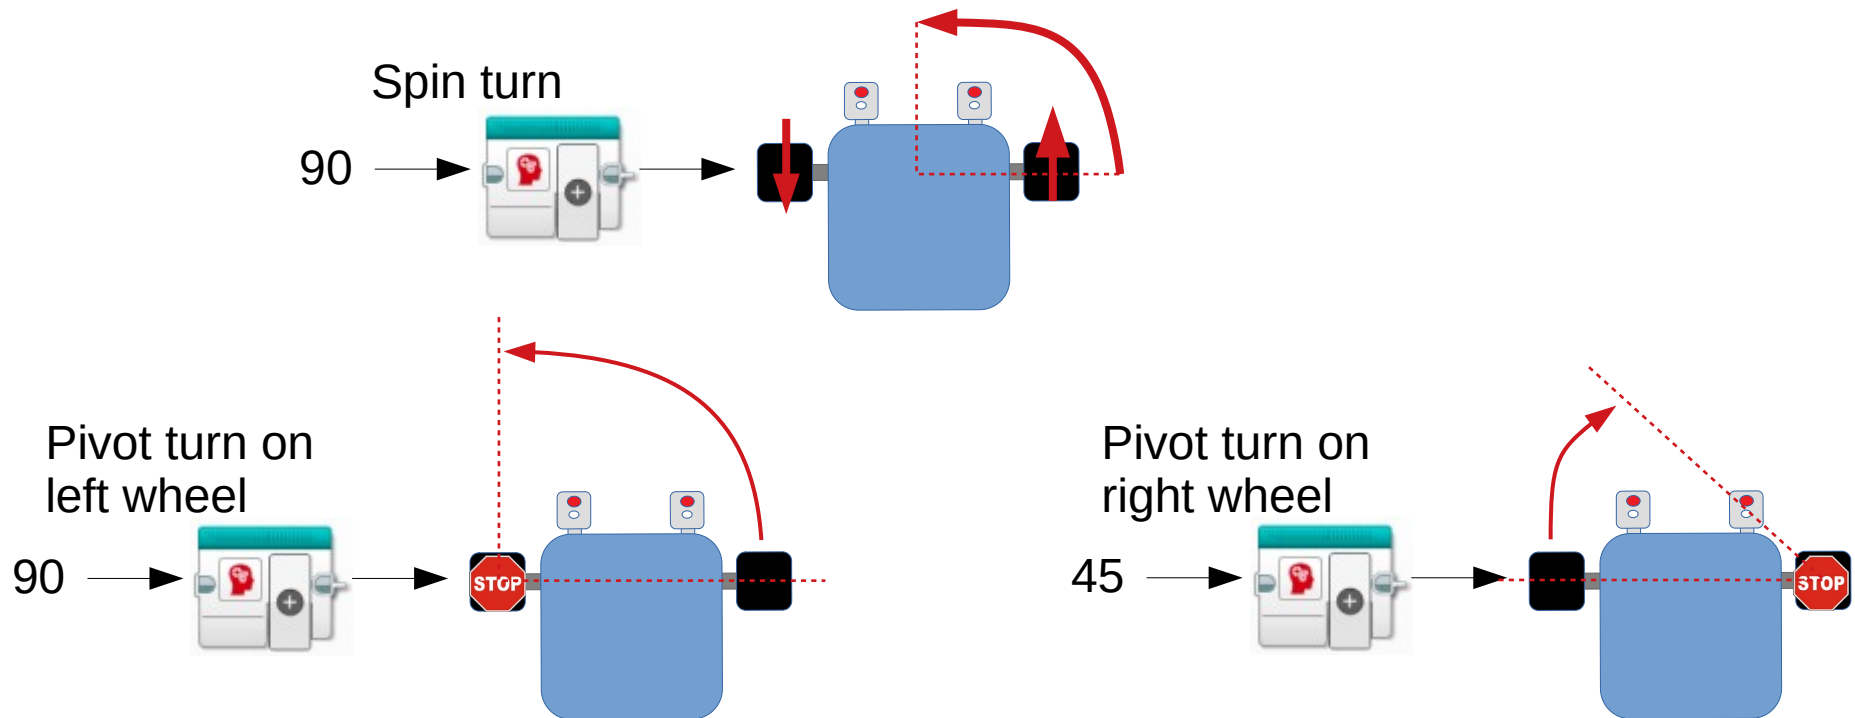

- Move distance (cm)
  - Use with a measuring tape to reduce trial and error

# Useful Functions (Dead Reckoning)

- Turns

- Use with a protractor or...  
<https://quirkycort.github.io/misc/angles.html>
- Spin turn (degrees)
- Pivot turn right and Pivot turn left (degrees)

# Dead Reckoning

- Dead reckoning functions are inaccurate
- Easy to make, acceptable if...
  - Distances are short, and
  - Wheels are far apart
- Gyro versions are superior in most cases

# Useful Functions (Following)

- Move distance following line
- 4 types
  - Left sensor – Left side of line
  - Left sensor – Right side of line
  - Right sensor – Left side of line
  - Right sensor – Right side of line

# Useful Functions (Following)

- Move distance following wall
  - Use ultrasonic pointing sideways
  - Useful when traveling long distance
  - Better to glide against wall if not turning

# Useful Functions (Alignment)

- Clockwise align to line
- Counter-clockwise align to line

- Move till white (Left and Right)
- Move till black (Left and Right)

Move till black  
(Stops when it  
reaches the black line)

# Useful Functions (Gyro)

- Rotate to gyro angle (degrees)
  - Unlike a normal spin turn, this takes reference from the starting angle
  - Similar use as wall alignment, and can be used when the wall isn't available
  - Must calibrate gyro before use

# Useful Functions (Gyro)

- Move distance following gyro
  - Use the gyro to help robot move in a straight line
  - Better to align to wall or line if possible
  - MUST calibrate gyro

# Caveat

- You may not need all of these functions...
- ...but most of these can be reused for future FLL and WRO
- Will likely need to prepare variations of these basic functions. For examples...
  - “Move following line (cm)” → “Move following line (until black)”
  - “Move till white” → “Move till yellow”
